

## Show Dogs Article

### Wiccaweys recommend CSJ!

People don't realise how important diet is for their dog. In rescue, we see a lot of dogs who are accused of having behavioural problems when in actual fact, their diet is the cause. Border Collies are particularly sensitive to a bad diet.

It's critically important that a food has no artificial additives and colourings. After all, dogs don't care what colour their food is, so why have the colourings in there?

That's why we have to feed a good quality food. Not only to make sure any issues aren't food related, but also to put weight onto dogs who have been badly treated and underfed in the past. CSJ is excellent for this, helping dogs to gain weight steadily, whilst also making noticeable improvements to coat condition.

We have no hesitation in recommending CSJ to new adopters, and we provide a 'Going Home Pack' with a tub of CSJ Natural Champ food so that their new friend gets a great start in their new home.

We've found that CSJ is a great food for all the dogs at Wiccaweys, and all dogs large or small enjoy it. Some dogs love it so much, we can use it as a training treat!
